Supporting Gensuite Reg Tracker™

The Regulatory Framework Service

Do you need a better way to understand how regulatory updates impact your operations? Is your team looking for guidance on what EHS legislation is applicable for your sites? Are you a SME looking to review legislation and updates on a specific EHS topic?

Supplement your monthly updates with the GENSUITE REGULATORY FRAMEWORK SERVICE!

WHY A REGULATORY FRAMEWORK

PROVIDES CONTEXT FOR THE REG TRACKER

▶ Comprehensive list of all EHS legislation for Federal and State jurisdictions

▶ Provides the relevant agency, key regulatory topics, citations, and a link to the official text of the legislation

▶ An optional enhancement includes a narrative description of the scope of the compliance program elements for the key topics and their applicability to your operations

▶ Maintains the same scope as the Reg Tracker services and prepared by the same experienced consulting experts at Specialty Technical Consultants, Inc. (STC), a Gensuite Alliance Partner http://www.specialtytechnicalconsultants.com/

INCREASED FUNCTIONALITY

▶ Linked to the monthly regulatory updates provided in Reg Tracker and Reg Tracker READY

▶ Filter on key topics and citations within the regulatory framework to tailor your review of the regulatory updates

▶ Quick reference to foundational requirements for monthly updates when reassessing compliance needs

THE BIGGER PICTURE

▶ Use the Regulatory Framework Service on its own as a tool for understanding what legislation is applicable

▶ Add the Regulatory Framework Service to Reg Tracker and other Gensuite applications, such as Site Profiler and Reg Auditor

▶ Employ the Service as a training tool for new EHS and operational professionals in your organization
